Studata

This program gets user data to store from students. It is possible to delete and edit it later.

Installation

Use console to compile and start program. Java needs to be installed on your system.

Install java

```
sudo apt update
sudo apt install openjdk-19-jdk
```

Compile and start

```
javac *.java
java Studata
```

If you did everything right you will see a menu

Figure 1: Menu with controls *** ## Usage

Available Commands
